

Aria Eshraghi

Assistant Professor at University of Florida

Gainesville, FL, US

Aria Eshraghi has expertise in infection microbiology and his team's goal is to develop new ways to prevent and treat infections.

Biography

Aria Eshraghi's research program investigates how bacteria use virulence factors to evade detection by the immune system and cause disease. Aria's team uses highly pathogenic bacteria as models to understand how bacteria inject toxins into the host and to characterize the pathways that underlie pathogenesis. Aria's goal is to discover these bacterial pathways and toxins so that we can develop countermeasures to prevent and treat infections.

Areas of Expertise

Francisella, Francisellosis, Graduate Education in the Life Sciences, Tularemia, Tularensis
