

John Jaeger

Associate Professor at University of Florida

Gainesville, FL, US

John Jaeger researches the ways in which hurricanes have impacted Florida's coastline.

Biography

John Jaeger researches the ways in which hurricanes have impacted Florida's coastline. Since 2009, he has observed and documented from Kennedy Space Center the causes for shoreline retreat near critical infrastructure, noting that an increase in the frequency of major storms heightens the threat of saltwater intrusion to the launch pads.

Industry Expertise

Research, Education/Learning

Areas of Expertise

Coastal Erosion, Biodiversity and the Environment, Sea Level Rise

Affiliations

American Geophysical Union : Member, Geological Society of America : Member, Society of Economic Paleontologists and Mineralogists : Member, American Association of Petroleum Geologists : Member
