

Autumn Harris

Assistant Professor at University of Florida

Gainesville, FL, US

Autumn Harris is interested in managing chronic kidney disease in companion animals and medical therapies to improve the lives of pets.

Biography

Autumn Harris is an assistant professor of small animal internal medicine at the College of Veterinary Medicine. Autumn's benchtop translational science is directed at understanding the mechanisms through which the kidneys maintain the correct acid-base balance in the body. Her clinical research focuses on the investigation of acid-base balance during chronic kidney disease (CKD), focusing on novel biomarkers and new therapies for managing CKD. Autumn is also active in investigations of cardio-renal syndrome. Her goals in clinical research are to enhance the lives of companion animals with kidney disease so they can live their best life possible.

Areas of Expertise

Acid-Base Homeostasis, Androgens, Chronic Kidney Disease, Hypertension, Proteinuria, Renal Physiology, Sexual Dimorphism, Sex Steroid Hormone Receptors, Small Animal Internal Medicine
