Brad Moody

Associate Professor of Digital & Interactive Media at Daytona State College

Daytona Beach, FL, US

Creative Technologies and Education

Biography

Educator?Digital Artist Digital Media is often defined as a range of varied topics and it?s rare that there is a collective opinion regarding what falls under this category. My ongoing research and educational direction is done so with this in mind to highlight the array of areas digital platforms are integrated under the greater topic. Electronic Arts is the core of my research, interest and experience. With research into all aspects of video, sound, new and emerging technologies, mobile media and interactive design I critically and creatively explore the different possibilities in fusing the aspects of each to create multi-faceted works.
