

Dalal Hanna

PhD Student, Natural Resource Sciences at McGill University

Montreal, QC, CA

Scientist researching aquatic ecosystem services and protected areas (Services écosystémiques aquatiques et les aires protégées)

Biography

Dalal is a PhD student at McGill University in Canada, currently researching aquatic ecosystem services and protected areas. Before starting her PhD she completed a Bachelors in Environmental Sciences during which she conducted research on the ways anthropogenic noise affect bird song. Following the completion of this degree she and a group of seven friends embarked on a cross-Canada canoe trip, raising awareness and funds for the conservation of watersheds in Canada. She then completed a Masters in Biology, studying the ecology of African freshwater fish. She also hosted a scientific podcast called Science Faction, which is all about unbelievable discoveries, is part of an urban beekeeping collective in Montreal, co-runs a series of R workshops, and enjoys spending time outdoors thinking about how we can better improve future conservation strategies.

Areas of Expertise

Aquatic Ecosystem Services, Protected Areas, Urban Beekeeping, Landscape Ecology, Beekeeping

Education

University of Ottawa

Bachelors Environmental Sciences

McGill University

Masters, Biology Biology
