

Dorothea Herreiner

Associate Professor of Economics at Loyola Marymount University

Los Angeles, CA, US

Bellarmino College of Liberal Arts

Biography

Dorothea Herreiner is a microeconomist, game theorist, and experimental economist. She is interested in how individuals make choices and how these choices affect and are affected by the circumstances under which they are made. Dorothea has investigated and published on self organization, market institutions and rules. She has applied her knowledge of market structures to art markets (see gallery survey). Dorothea has also focused on the trade-offs between competition and cooperation between players in games, and in particular, in networks. Another major area of her work and publications deals with fairness and justice criteria, both from a theoretical and experimental perspective. She has also analyzed the role of information, punishment, and externalities in public good and common pool resource experiments. Her most recent work focuses on competition attitudes of males and females and the role of stress in decision making.

Areas of Expertise

Experimental/Behavioral Economics, Environmental Economics, Microeconomics, Cultural Economics, Faculty Development, Teaching and Learning, Industrial Organization, Game Theory, Social choice

Affiliations

American Economic Association : Member, Econometric Society : Member, Game Theory Society : Member, Economic Science Association : Member, Association for Cultural Economics International : Member
