

Dr Nicola Logan

Professor in Optometry at Aston University

Birmingham, , GB

Dr Logan's current research interests include the development, progression and management of myopia.

Biography

Dr Nicola Logan's current research interests include the development, progression and management of myopia. Her work spans from basic laboratory experimentation and translate through to clinical trials that involve different strategies to slow myopia progression in children. Nicola runs both an active myopia research lab and a clinical service in myopia management. We run a number of clinical trials in myopia management and integrate findings into our clinical practice ensuring we offer the best evidence based options.
