

# [Dr. Nicole Egenberger](#)

**Clinic Director & Naturopathic Doctor at Remède Naturopathics**

New York, NY, US

Naturopathic doctor. Founder of New York's leading clinic for naturopathic medicine. Expert in research-driven natural medicine.

---

Dr. Egenberger completed four years of post-graduate medical education at the Canadian College of Naturopathic Medicine after receiving a Bachelor Degree in Cell Biology and Philosophy at McGill University in Montreal. She is a past winner of the prestigious Estate of Joyce Vanderburgh Award for clinical excellence. Dr. Egenberger has pursued her love of homeopathic and botanical medicines in further post-graduate training with world-renowned experts in homeopathy and botanical medicines, including Jan Scholten, Rajan Sankaran and Louis Klein. She currently holds a Connecticut State Naturopathic Physician's license. In her practice, Dr. Egenberger focuses on women's health concerns and autoimmune conditions. Committed to furthering medical research, Dr. Egenberger has published work in the field of endocrinology and is currently developing protocols for the combined use of detoxification, clinical nutrition, and European biological medicine. Dr. Egenberger is former Vice President of the New York Association of Naturopathic Physicians. She is a member of the American Association of Naturopathic Physicians and the Institute of Naturopathic Education and Research. A Canadian with Hungarian and Australian roots, Nicole speaks French fluently and welcomes French-speaking patients. A lecturer and educator, she provides expert advice on naturopathic medicine and natural healing.

## **Genetic Mutations in Methylation: SNP Impact on Patients and Treatment**

Genetic mutations (SNPs) in the methylation pathway are a common underlying cause of many chronic conditions, including cardiovascular disease, depression, infertility, chronic fatigue, and chronic pain syndromes. Addressing SNPs through nutritional and dietary interventions can significantly improve treatment. This talk highlights the implications of some of the most common SNPs and potential treatment options.
