Eric Loken, Ph.D.

Associate Professor of Educational Psychology at University of Connecticut

Storrs, CT, US

Professor Loken studies advanced statistical modeling with applications to large-scale educational testing.

Biography

There are many exciting opportunities for applying statistical advances to research in education and health. I have ongoing work examining web-based assessment and interventions in education, as well as work looking at weight status and obesity.

Areas of Expertise

Online Testing, Educational Psychology, Educational Testing, Bayesian Inference
