

George Dinwiddie

President at IDIA Computing, LLC

Pasadena, MD, US

Helps you develop the right software, that works right, in the most effective manner.

Biography

George Dinwiddie helps organizations develop software and systems more effectively, bringing thirty years of development experience from electronic hardware and embedded firmware to business information technology. He helps organizations, managers, and teams solve the problems they face by providing coaching, mentoring and training. Capable across the broad range from process improvements to engineering skills, George currently has special interest in team-building, collaboration between business and technical, acceptance test driven development, developer and tester skill-building, and Agile process transformation. He has helped numerous clients, large and small, in the U.S. and overseas, and has presented at conferences such as the Agile conference, Agile Development Practices, and numerous regional or specialized conferences.
