

Greg Garner

Design and Computational Thinking Lead at The Friday Institute

Raleigh, NC, US

I work with teachers, instructional coaches, principals, and district-level teams to create new models of learning.

Biography

I am a change catalyst. Always improving and taking people with me, I define success as empowering others to be successful themselves. I put power and control into the hands of others, allowing them to experience self-guided learning processes under my facilitation.

Sample Talks

Automatic Differentiation

You want to use technology in your classroom. You really do. You want to have more differentiation and build in Universal Design for Learning flexibility and scaffolding, but who has the time? In this hands-on session, we will find out how you can use simple, web-based projects in a collaborative environment to reach all of your students, no matter their ability or background with technology. You are going to find out the 'secret' to automatic differentiation.
