

Jeff Prince

Professor and Chair at Indiana University, Kelley School of Business

Bloomington, IN, US

Expert in industrial organization, applied econometrics, IP, and antitrust; industry expertise in high technology, telecom and airlines.

Biography

Jeff Prince is Professor of Business Economics and Public Policy at the Kelley School of Business, Indiana University and recently served as Chief Economist at the Federal Communications Commission. He is also the Harold A. Poling Chair in Strategic Management and Co-Director of the Institute for Business Analytics at Kelley. He is an accomplished empirical researcher in the broad categories of industrial organization and applied econometrics. His primary focus is on technology markets and telecommunications, having published works on dynamic demand for computers, Internet adoption and usage, the inception of online/offline product competition, and telecom bundling. His research also encompasses topics such as household-level risk aversion, airline quality competition, and regulation in healthcare and real estate markets. His works have appeared in top general interest journals in both economics and management, including the American Economic Review, the International Economic Review, Management Science, and the Academy of Management Journal. He has also published in top journals in industrial organization, including the Journal of Industrial Economics, Journal of Economics and Management Strategy, and the International Journal of Industrial Organization. He is currently a co-editor at the Journal of Economics and Management Strategy, and is on the board of editors at Information Economics and Policy.
