

Jens Naumann

CEO at Green-First Technologies Inc.

Napanee, ON, CA

Inner Strength Prevails: moving Mountains with a positive attitude...

Biography

Jens is CEO of Green-First Technologies, an Ontario-based Renewable Energy Systems company involved in small and large scale Wind, Solar and Thermal Energy projects. Having a strong technical and practical electronic background, Jens delivers refreshing, out of the box, thought provoking innovative concepts to your boardroom. Jens' great observation, and detailed nature is coupled with his skill as Social Services Worker, leading him to be both patient and employee of Dobelle Institute, a famed medical devices research company launching a project of vision restoration using cortical stimulation; for which Jens drove a car using this technology in ASAIO 2002. Jens' logical and motivational manner, coupled with his sensitivity to human needs as outlined in his book Search for Paradise, making him a dynamic, inspirational speaker with an unmatched ability to communicate his message.

Dobelle Institute Ltd., Ontario College of Social Service Workers

Sample Talks

Overcoming barriers and challenges.

Generally we have 3 types of barriers: - Personal - Logistical and - Our support team. How to overcome each one of these, is crucial to every individual's success both on a personal and or a group level in whatever industry one finds oneself. Identifying, analyzing, refocusing, redistributing and regrouping the perceived barrier. These are some of the greatest keys geared to thriving will ensure our road to success.

Embracing Green Energy and making it work.

Since the beginning of this century, we have seen a lot of investment in renewable energy. However, we have not seen our energy bills decrease nor has our oil consumption. So what went wrong? Understanding the electrical grid, multiple interconnected power plants, intermittent renewable energy, the nature of alternating current and green energy politics is the key to a successful transition from conventional energy dependence.

The Winning Plan (Living our best).

According to Abraham Maslow, every individual deserves the right to live to his/her fullest potential. Defining: Fullest potential, this includes; - The right to contribute - Socialize - Learn - Travel and - Explore the very essence of life itself. Regardless of challenges, barriers or third party opinions; this goal is readily attainable through the development of one's inner strength.
