

Julie Levy

Distinguished Professor at University of Florida

Gainesville, FL, US

Julie Levy focuses on shelter animal wellness, feline infectious diseases, spay/neuter and humane cat population control alternatives.

Biography

Julie Levy and her colleagues' studies include the discovery of new diseases, treatments that are better and more cost-effective, faster and more accurate diagnosis, safer anesthesia and surgery, upscaling spay/neuter programs, improving pet adoption success and enhancing positive outcomes for the most vulnerable animals, such as cats with FeLV or FIP and dogs living through distemper outbreaks. Julie and her team's strategy is to identify emerging threats early, then put together study designs that discover the cause and solutions simultaneously. When needed, the team will bring in expert collaborators from across the country and tap into the energy of advanced trainees and veterinary students. The team's accelerated approach leads to solutions that are immediately practical, affordable and effective in the field where they are needed.

Areas of Expertise

Animal Welfare, Feline Infectious Diseases, FeLV, FIP, FIV, High Quality High Volume Spay-Neuter, Humane Community Cat Management, Nonsurgical Contraception in Cats and Dogs, Shelter Medicine
