

Kerrie Sendall

Assistant Professor at Georgia Southern University

Statesboro, GA, US

Professor Sendall focuses on the effects of global climate change on plant traits such as photosynthetic rates, growth, and survival

Biography

My research interests include plant ecophysiology, climate change, forest dynamics and biodiversity, invasive species, and restoration ecology. My current work examines the effect of global climate change on plant functional traits such as photosynthetic rates, growth, survival, and nutrient dynamics.

Areas of Expertise

Invasive Species, Biodiversity, Climate Change, Biology, Biology of Plants, Environmental Biology, Forest Ecology, Restoration Ecology

Education

University of Minnesota and Macquarie University

Ph.D.
