

Lance McBrayer

Associate Dean at Georgia Southern University

Statesboro, GA, US

Lance McBrayer is an expert in organismal ecology

Biography

My research interests lie in organismal ecology which encompasses behavior, functional morphology, and evolution. I primarily use lizards as a model system and have done studies on feeding behavior, foraging ecology, and locomotion in a variety of species. Central to my research is the study of organismal performance, or how well organisms perform ecologically important tasks like biting, jumping, or sprinting. I am also the curator of our herpetology collection (~36,000 specimens). This collection provides a rich source of natural history data for this region. If interested, feel free to contact me or visit my home page for more information.

Areas of Expertise

Anatomy, Behavior, Herpetology

Education

Ohio University

Ph.D.

Buffalo State University

M.S.
