Lawrence Husick

Sr. Fellow at Foreign Policy Research Institute

Philadelphia, PA, US

Experience, dynamic, humorous and knowledgable on a stunningly wide range of topics.

Biography

Lawrence A. Husick?s 32 years? experience as a technology consultant, computer system designer, and software author, as well as his 29 years of experience as an intellectual property lawyer give him a unique perspective on the need to focus on innovation as a central pedagogical theme and a defining characteristic of terrorism. As a co-director of the FPRI Wachman Center Program on Teaching Innovation, he applies his background in both law and technology to the study of innovation as an organizing principle of history, science and technology, economics, and sociology. As a Senior Fellow in the Center on Terrorism, he studies and lectures on Cyberwar and related issues. Mr. Husick holds a BSc degree cum laude in Environmental Chemistry from Muhlenberg College. He holds a JD degree from the Washington College of Law, where he also did graduate work in microprocessor systems design. He is a partner in Lipton, Weinberger & Husick, an intellectual property law firm.

Sample Talks

The History and Future of Innovation

Innovation is not just tools and toys - it's ways of thinking, doing, and seeing the world as it might be. Using "big history" techniques, Husick explores the topic from dozens of angles, and in the process, entertains and teaches his audience how to become more innovative in their own field.
