

Liette Vasseur

Professor and UNESCO Chair at Brock University

St. Catharines, ON, CA

Working in Environmental sustainability, mainly sustainable agriculture and conservation

Biography

Dr. Vasseur is a full professor in the Department of Biological Sciences at Brock University where she is also a member of the Women and Gender Studies program and the Environmental Sustainability Research Centre, one of the five transdisciplinary spaces at the university. Since 2014, she holds the UNESCO Chair on Community Sustainability: from Local to Global at Brock. She currently leads the thematic group on Climate Change Adaptation of the Commission for Ecosystem Management of the International Union for Conservation of Nature. Her research program is highly interdisciplinary and links issues such as community-based ecosystem management, climate change adaptation and resilience and sustainable agriculture and rural communities. In Canada it includes impacts of extreme events on meadow ecosystems and ecosystem/landscape sustainable development and resilience in Niagara rural communities. Her community-research work on climate change adaptation with the City of Greater Sudbury led her to receive in 2011 the Latornell Pioneers Award from Conservation Ontario. She was part of the codirection committee of a large project on Coastal Communities Challenges in the face of Climate Change, funded by the Social and Humanities Research Council of Canada, which looked at resilience and ecosystem-based adaptations in ten coastal communities of Atlantic Canada. She has produced over hundred publications and more than 200 presentations as a researcher. Her work focuses not only on Canada but also internationally such as in China, where she is a Minjiang Scholar at Fujian Agriculture and Forestry University. She is also involved in Ecuador on climate change adaptation and resilience (Paramos) as well as sustainable agriculture development (San Juan) in Ecuador with ESPOCH in Riobamba. Previously she worked in Burkina Faso on community-based conservation management. As the topic of women has also been a point of focus in her international research, she is involved in some women organizations. She is currently the President of the Canadian Coalition of Women in Engineering, Science, Trades and Technology (CCWESTT) and the President-Elect of the International Network of Women Engineers and Scientists (INWES).

Industry Expertise

Renewables and Environmental, Research, Agriculture and Farming, Women, Training and Development, Floriculture and Horticulture, Education/Learning, Biotechnology

Areas of Expertise

Plant biologist, Pest management, Ecosystem Management, Ecosystem services, Conservation Biology, Landscape Ecology, Plant-insect interactions, Ecology, Gender Education and Work, International Development, Sustainable Agriculture

Affiliations

Environmental Studies Association of Canada , Canadian Coalition of Women in Engineering, Sciences, Trade and Technology , Association de la francophonie à propos des femmes en sciences, technologies, ingénierie et mathématiques , Ecological Society of America , Canadian Botanical Association , Niagara Land Trust, Steering Committee of the Commission for Ecosystem Management of the International Union for Conservation of Nature, International Network of Women Engineers and Scientists

Event Appearances

Transitioning the sustainability of coastal rural communities facing climate change ? A complex story - Panel

International Rural Sociology Association Conference

Ecosystems sustain development

EcoForum Global

Expecting mother in a dangerous environment: is the support always there?

INWES Regional Conference Europe

Governing Ecosystems to sustain development

IUCN World Conservation Congress

Ecosystem-based adaptation to climate change leading towards sustainable solutions.

Conference on resilience and climate change in Ecuador.

Climate Change in Canada: What happens when the weather is out of control and ice caps melt?

our Burlington Third Age Learning (3ALB) -11th series of lectures, focusing on Big Questions?Big Ideas?All Over the Map

UNESCO Week for Peace and Sustainable Development

Review Forum for the UNESCO Global Action Programme (GAP) on ESD

Education

Queen's University

PhD Biology Evolutionary ecology

Université du Québec à Montréal

MSc Biology Ecology

Université de Sherbrooke

BSc Ecology Ecology

Accomplishments

UNESCO Chair - Community sustainability: from local to global

UNESCO Chairs are nominated by the universities and approved by the Secretariat of UNESCO in Paris and renewable every four years. The Chairs are recognition award in research and education allowing the holders to further work in these areas at the international level.
