

Lorraine Lipscombe

Endocrinologist at Diabetes Canada

Toronto, ON, CA

Dr. Lorraine Lipscombe is a scientist at Women's College Research Institute, an endocrinologist at Women's College Hospital

Dr. Lorraine Lipscombe is a scientist at Women's College Research Institute, an endocrinologist at Women's College Hospital, and an associate professor in the Department of Medicine and associate professor in the Institute for Health Policy, Management and Evaluation at the University of Toronto. In addition, she is a senior adjunct scientist at the Institute for Clinical Evaluative Sciences. She serves as the Director of the Centre for Integrated Diabetes Care and the Medical Co-Director of the Endocrine clinic at Women's College Hospital. Dr. Lipscombe has developed a successful research program that focuses on the prevention, care and outcomes of diabetes, with a specific focus on diabetes in women. Her team is currently piloting a home-based lifestyle intervention program for women with recent gestational diabetes, to lower their future risk of type 2 diabetes. In addition, Dr. Lipscombe is leading a research program addressing the complex relationship between type 2 diabetes and cancer. Her studies of population-based health administrative data have shown that diabetic women get fewer screening mammograms, and that postmenopausal breast cancer survivors have a higher incidence of diabetes. She is now studying other factors that increase breast cancer risk in diabetic women. Another key area of interest focuses on the improvement of health service delivery for diabetes management. Dr. Lipscombe has shown that low-income patients with diabetes have higher mortality rates, and thus must be the focus of greater preventive efforts. Dr. Lipscombe has published over 70 peer-reviewed papers, and holds the prestigious New Investigator Award from the Canadian Institutes for Health Research. Her research program is supported by the Lawson Foundation, the Canadian Diabetes Association, and the Canadian Institutes for Health Research.

Research, Health Care - Providers, Health and Wellness, Non-Profit/Charitable

Endocrinology, Gestational Diabetes, Diabetes in Women, Endocrine and Metabolic Disorders, Diabetes Prevention, Outcomes of Diabetes

Institute for Clinical Evaluative Sciences : Senior Adjunct Scientist , University of Toronto : Associate Professor Faculty of Medicine, Women's College Hospital : Director Centre for Integrated Diabetes Care, Women's College Research Institute : Scientist, Women's College Hospital : Medical Co-Director Endocrinology Clinic , Diabetes Canada : Member
