

Mathijs De Vaan

**Assistant Professor at Haas School of Business, University of California,
Berkeley**

Berkeley, CA, US

Leading expert on social networks in health care

About

Mathijs De Vaan is an Assistant Professor at the Haas School of Business. He earned his PhD from the Department of Sociology at Columbia University after defending his dissertation in June 2015. Mathijs' main research agenda focuses on social networks in health care. Motivated by the high level of variation in the cost and quality of care, Mathijs' research examines the role of relationships between patients, between physicians, and between patients and physicians in the emergence and persistence of this variation. A second line of inquiry focuses on inequality in the production of science.
