

Michelle Cawthorn

Associate Professor at Georgia Southern University

Statesboro, GA, US

Professor Cawthorn specializes in the ecology and behavior of small mammals such as shrews and small mice

Biography

I am interested in the ecology and behavior of small mammals, particularly cryptic species that present challenges to capture and monitor such as shrews and small mice. I have adapted radio transmitters for use with these tiny species (space use and movements of short-tailed shrews) and designed special traps to maximize capture success (ecology of the eastern harvest mouse). I also have a strong interest in science education, and I am especially interested in methods of teaching and learning that improve science literacy for the general population.

Areas of Expertise

Animal Behavior, Herpetology, Biology, Environmental Biology

Education

Bowling Green State University

Ph.D.

Old Dominion University

M.S.
