

Monica Granados

Post-doctoral fellow at University of Guelph/Wildlife Conservation Society Canada

Guelph/Toronto, ON, CA

Conservation through open science.

Biography

Monica is a post-doctoral researcher at the University of Guelph and the Wildlife Conservation Society Canada. She received her PhD from McGill University where she studied how the introduction of omnivory affects food webs. Her current research involves studying how warming affects who-eats-whom in an ecosystem. Recognizing the importance of applying theory to practice, Monica has worked as a consultant for the Toronto Region and Conservation Authority and Environment Canada. She is a staunch advocate of open science and has delivered workshops on practicing in the open in Montreal and Toronto. Monica is also an improviser performing with the Making Box Brigade in Guelph and teaches workshops on how improv can improv science communication.

Industry Expertise

Environmental Services, Research, Fishery and Aquaculture

Areas of Expertise

Ecology, Open Science, Invasive Species, Conservation Biology, Food webs

Affiliations

Ecological Society of America Open Science Section , OOO Canada Research Network , Action Potential Lab , The Making Box

Education

University of Toronto

Bachelors of Science Ecology

University of Toronto

Masters of Science Ecology

McGill University

PhD Ecology

Accomplishments

Innocentive Visualizing Nutrients Challenge Runner-up
Awarded as a finalist in the Innocentive Visualizing Nutrients Challenge
