Monte W. Davenport, Ph.D.

Developmental, Learning, & Executive Functioning Specialist at Life Solutions of Dallas-Fort Worth

Southlake, TX, US

Monte W. Davenport, Ph.D.

Biography

For 20 years, Dr. Davenport?s career has been dedicated to helping families, children, teens, and adults develop skills needed to be successful in the classroom, at work, on the playground, and in life. In August 2010, Monte opened Dallas-Fort Worth?s first center dedicated to using research-based techniques to address the needs of children, teens, adults, and families struggling with executive functions (sustained attention, organization, time management, planning, prioritizing, task initiation, persistence, response inhibition, emotional control, cognitive flexibility, and self-monitoring.) Throughout his career, Dr. Davenport has been committed to educating families, educators, and other professionals to meet the needs of struggling children and teens. Sample Talks

Executive Functioning & ADHD for Adults, Parents, & Educators
Executive functioning skills (time management, planning/prioritizing, task initiation, self-monitoring, organization, working memory, response inhibition, emotional control, & cognitive flexibility) can hamper learning and productivity. Dr. Davenport's talks help adults, parents, and educators understand and learn how to improve these skills. For more information, see http://www.drmontedavenport.com/talks/.
