

Philip Gorelick

Professor of Translational Science and Molecular Medicine at Michigan State University

East Lansing, MI, US

Expert in stroke prevention and risk factor identification.

Biography

Philip B. Gorelick is a professor of translational science and molecular medicine at MSU and the emeritus medical director of the Hauenstein Neuroscience Center at Saint Mary's Health Care in Grand Rapids, Michigan. His work is centered around stroke prevention and identifying risk factors. Gorelick has received nearly \$40 million in research funding from the National Institutes of Health and has helped lead a clinical trial studying a new clot-busting drug for strokes. He has also worked with the American Heart Association offering guidance on preventing cognitive impairment and dementia by controlling risk factors for cardiovascular disease.
