Testimonials

Guy DeFlorio

I worked with Rachel on our corporate web site. When we started, I knew relatively little about SEO, content marketing and web site strategy. Rachel worked with us to explain how to get better results, how to build campaigns and improve the overall usefulness of our web site. She has the patience to clearly explain the nuances of search engines and why certain practices work, and why others do not. She was also able to show how simple changes made on our site had profound effects on how customers could find us and do business with us. The experience left me much more educated about the workings of the web, and how companies can draw more customers and more activity to their site. Rachel has a unique blend of technical knowledge, practical experience and effective communication that can be used by any company looking to improve their digital presence.
