

Raga Bjarnadottir

Assistant Professor at University of Florida

Gainesville, FL, US

Ragnhildur Bjarnadottir is an expert in using health informatics and data science to improve care quality for underserved populations.

Biography

Ragnhildur "Raga" Bjarnadottir's research focuses on leveraging health informatics and data science to improve health care quality for underserved populations. Her dissertation research examined home care nurses' assessment and documentation of patients' sexual orientation and gender identity. She has also explored EHR implementation and nurses' experiences with documentation systems in the long-term care setting. In her current research, Raga uses text-mining methods to identify factors associated with risk of patient falls in acute care nurses' progress notes.

Industry Expertise

Health Care - Services

Areas of Expertise

Artificial Intelligence, Quality of Care, Data Science, Nursing Informatics, Clinical Decision Support, Underserved Populations
