

Robert Lanza

Scientist at Ocata Therapeutics

Boston, MA, US

Robert Lanza is currently Chief Scientific Officer at Ocata Therapeutics and Adjunct Professor at Wake Forest University School of Medicine.

Biography

Robert Lanza was named one of the 100 most influential people by TIME Magazine in 2014. He is a world renowned scientist from Boston, Massachusetts focusing on research areas such as stem cells and regenerative medicine. In this field, he hopes to provide therapies for some of the deadliest and debilitating conditions found around the world. Robert Lanza is also well known for developing the theory of biocentrism, a theory that explains how life and consciousness are the keys to explaining the true nature of the universe.
