

Ryan Klein

Assistant Professor at University of Florida

Gainesville, FL, US

Ryan Klein studies how trees in urban areas are affected by hurricanes and the risks these damaged trees pose to property and residents.

Biography

Ryan Klein studies how trees in urban areas are affected by hurricanes and the risks these damaged trees pose to property and residents. He can address questions about the multitude of variables, including species, defects, site conditions, previous management, wind speed, precipitation, etc. that can cause trees to fail during hurricanes and other intense storms, as well as questions about when trees can be saved or should be removed.

Areas of Expertise

Tree Physiology, Biomechanics, Arboriculture, Tree Health, Tree Care
