Understanding The Gospel

Too many Christians think that the Old Testament was for then, but has no value for the New Testament believer. However, to fully understand the "Gospel of the Kingdom" you must first understand the history of humankind. In this talk I walk through the narrative of scripture, outlining the four major points of the story: Creation, Fall, Redemption in Christ and the Final Restoration (Re-Creation). This talk also highlights our role as the active agents of God's continual redeeming work on earth.
