

Thomas C. Shea, M.D.

Professor, Department of Medicine at UNC-Chapel Hill

Chapel Hill, NC, US

Dr. Thomas Shea is an expert on bone marrow and stem cell transplantation and hematologic malignancies.

Dr. Shea is a renowned clinician who specializes in hematologic malignancies and bone marrow transplantation. He has served on the Executive Committee of the North American and International Bone Marrow Transplant Registry and is the current President of the Scientific Advisory Board of the Center for International Bone Marrow Transplant Research (CIBMTR), the world's largest repository of data on bone marrow and blood stem cell transplant outcomes. Dr. Shea's commitment to clinical research is evident in his leadership and involvement in clinical trials. He is a co-author in a recent publication in the New England Journal of Medicine that demonstrated that the drug lenalidomide used as maintenance therapy after bone marrow transplantation slows down the progression of multiple myeloma. These exciting results will change the treatment for multiple myeloma patients. Dr. Shea is also the Associate Director for Outreach Programs for the UNC Lineberger Comprehensive Cancer Center, a program aimed at helping patients in communities located far away from major medical centers and who do not have frequent access to medical specialists.

Research, Education/Learning, Medical/Dental Practice
