

Wendy A. Clark, DDS, MS

Assistant Professor, Restorative Sciences, Division of Prosthodontics at UNC-Chapel Hill

Chapel Hill, NC, US

Dr. Clark is an expert in general and prosthodontic dentistry (dentures, implants and veneers).

Growing up, Wendy AuClair Clark saw first-hand the impact that a team of dental specialists (orthodontics, oral surgery, and prosthodontics) had on changing her younger brother's life and his smile. Wanting to help people and make that same impact, she chose a career as a dental specialist. Prosthodontics is the American Dental Association-recognized specialty of restoring and replacing teeth, both functionally and esthetically. After dental school, Dr. Clark completed a three-year residency in prosthodontics at the University of Alabama at Birmingham, where she was selected as chief resident her senior year and completed additional research and coursework to earn a Master's of Science in clinical dentistry. Dr. Clark is now a full-time assistant professor at the UNC-CH School of Dentistry's Department Restorative Sciences.
