

Yuji Kosuga

CTO at Everforth Co., Ltd.

Tokyo, , JP

Security Reseacher, XSSer

Biography

Yuji Kosuga is a research fellow at Japan Society for the Promotion of Science and Ph.D. student in computer science at Keio University, specializing in web application security. He has developed a software named Amberate that can automatically detect web applications vulnerabilities against SQL injection, Cross-Site Scripting, and JavaScript Hijacking, as a software creator for Information-technology Promotion Agency (IPA), Japan. He has still been developing it to detect other types of vulnerabilities, with novel approaches based on his research.

Industry Expertise

Security

Areas of Expertise

Java, Javascript, JSP

Affiliations

Everforth Co., Ltd.

Education

Keio University

Bachelor Computer Science

Keio University

Ph.D Computer Science

Keio University

Master Computer Science
